Overall statistics-

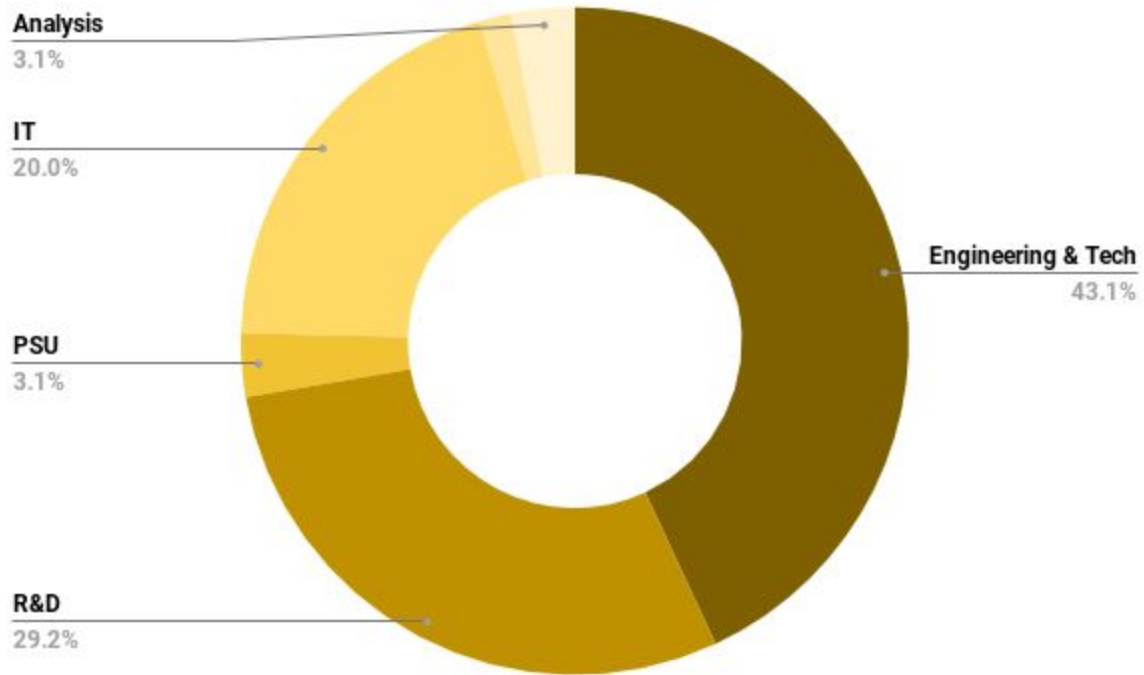

80% of interested students got the internship. Here, the interested students only includes those students who were eligible for the internship, that is, they did not have a summer course.

Out of the students who got the internship, CDC has helped 64% of the interested students in getting internship.

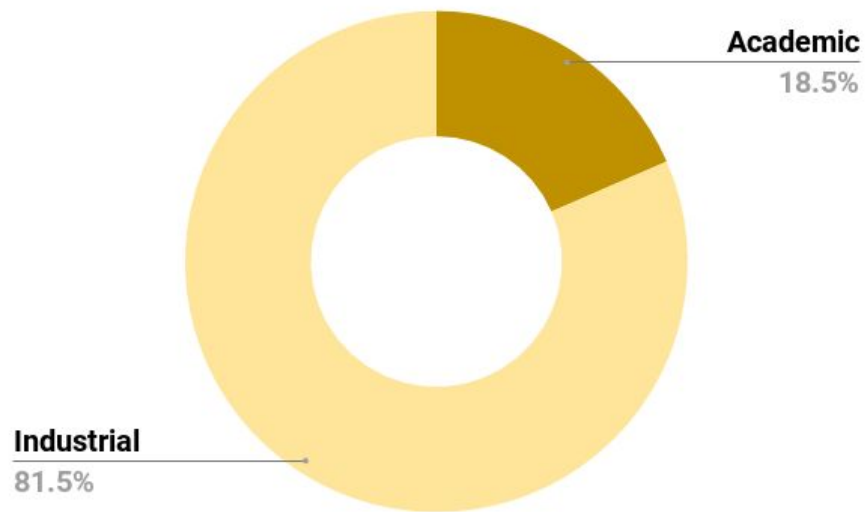

Sector wise analysis-

Majority of the students got internship in the engineering and technology sector, followed by the Research and development and then the IT sector.

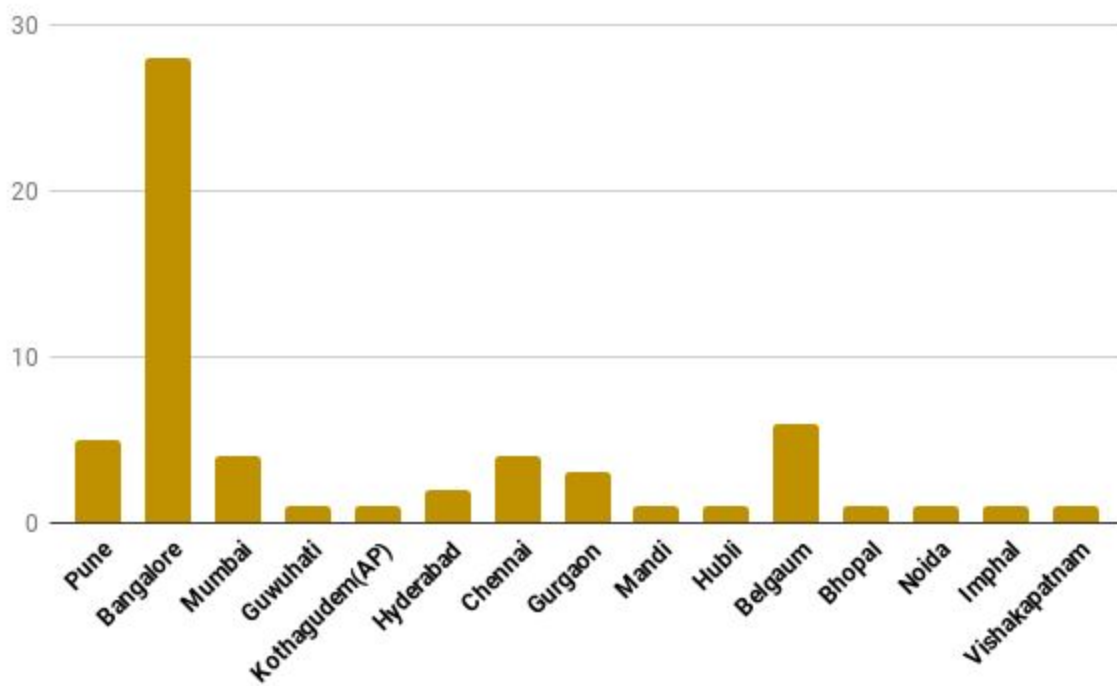

Sector	No of students
Engineering and technology	28
IT	13
Analysis	2
Education	1
Research and development	19
PSU	2

Academic and industrial internship-

A notable percentage of students went for academic internship as well.

Location wise analysis-

Internship offers outside India-

Singapore- 1

Spain- 1

Taiwan- 1

US- 1

Salary analysis-

The highest stipend was offered by Microsoft Research for 80000 per month. Most of the other companies offered stipend in the range of Rs 30000-60000 per month.

Our views-

The first internship season for IIT Dharwad was indeed a great success and we expect even a better placement and internship season next year. There were some companies that were interested in recruiting full time rather than hiring interns and we expect a good participation from them in the upcoming placement season. For the next season, we definitely expect a larger volunteering from the students in CDC related activities and a better management of the cell for various roles.
